

MIGHTY KICKS

I. Overviews

The 22nd World Cup is coming.

Another World Cup is about to take place, the whole world is eagerly waiting for the atmosphere of the biggest football festival on the planet. As diehard football fans and fans, we are proud to bring Mighty Kicks to the crypto market. So that all football lovers can live the sublime moments of real life with the game. Coming to Mighty Kicks not only satisfies the passion for football, everyone has the opportunity to make money from it.

Conceived and developed by a community of World Cup lovers and football fans, Mighty Kicks will be the leading product that will generate significant revenue for investors.

II. Why Mighty Kicks?

KICKS is a token built using blockchain technology to create new solutions that combine sports entertainment and monetization trends.

Mighty Kicks aims to be the most comprehensive sports blockchain ecosystem where fans can experience the game's features for themselves. Enjoy sports events, profit from unique sports NFTs, and generate revenue from in-game features.

Mighty Kicks is the complete synthesis ever of crypto games. At Mighty Kicks, players will experience integrated entertainment including kick-to-earn with oracle, prediction system, staking spin-to-earn, and DAO staking/voting.

III. How to begin with Mighty Kicks

1. Access the game web link:
2. Sign up for Mighty Kicks
3. Connect your Wallet
4. Purchase \$KICKS

5. Purchase NFTs

IV. Marketplace

Our NFT will be unique. Our NFTs are portraits of famous legendary football players. Intricately hand-drawn by Mighty Kicks' talented team of artists. Mighty Kicks aspires to bring a unique and exclusive collection of NFTs to all football fans.

On the NFT marketplace, participants can buy, sell and trade NFT images of legendary football players.

Participants can also trade these NFTs with others or display them in their own NFT library.

V. Oracle

Mighty Kicks has an in-game oracle system that ensures that players who join sooner or later are treated fairly.

For example:

- All NFTs are sold in tokens equivalent to 20 BUSD.
- Reward received will be adjusted by oracle. Whether the token price goes up or down, the reward value in BUSD is the same.

VI. NFTs Players

In Mighty Kicks, KICKS tokens will be inflation-controlled with token burning mechanisms for in-game features.

IN-Game: - Player will buy NFT with \$KICKS fixed by oracle mechanism. NFTs are divided into 3 rarities: Legend, Rare and Common. Each rarity will correspond to the reward value received by the participant. Different rarity will bring different reward values. The higher the player's rarity, the more tokens the participant will earn.

Payback date (ROI to calculate): 3-7 days. The reward will be x2 on the first day of the official release of the game.

VII. Gameplay

- Kick-to-earn

Players participating in Mighty Kicks will use \$KICKS tokens to purchase boxes. Open the dignity box to reveal the rarity of NFTs to play. Players will conduct the experience of playing with the NFT players in their collection in the Penalty section. With each rarity in 24 hours, players will have different shots. Specifically: Legend with 4 shots, Rare 3 shots, Common 2 shots. Shots will be refreshed for 24 hours. Every 15 minutes the Oracle mechanism will be updated. The higher the NFT rarity, the more tokens are earned.

- Team up

In addition to the Kick-to-earn gameplay, we will also be introducing a team mode. Players need to own a coach (through buying a coach box). Then set up a squad consisting of 1 coach and 5 players (must have a goalkeeper and 4 random players).

Your team will participate in the tournament (PvE mode). The deeper into the tournament, the more rewards will be.

If you win the final, you will receive a generous reward.

VIII. Staking - Spin2Earn

Participants will stake a certain amount of \$KICKS tokens to get tickets to spin at Mighty Kicks lucky wheel.

The number of tokens after staking will be locked for 14 days but you can get tickets and participate in spinning right after staking.

The lucky person participating in the wheel of fortune will have a chance to own:

- NFTs: Legend or Rare
- Token \$KICKS
- More specifically, the lucky person will win the jackpot with the value of x5, x10, even x100.

IX. Roadmap

PHASE 1

Project Concept

Gameplay & Economics Development

Website & Social Accounts Launching

Gameplay & Economics Testing

Prediction & Staking Testing

KYC Authentication

Contract Audit

Community Development

Testnet & Giveaway - KOLs & Communities

PHASE 2

Airdrop & Whitelist Campaigns

Marketing Campaigns by KOLs/Influencers

AMA with Big Communities

PinkSale Fair Launch Listing

Token Listing on PancakeSwap

Listing on CoinMarketCap & CoinGecko

Mainnet - Gameplay, Prediction, Staking, Marketplace

PHASE 3

Introducing DAO (Decentralized Autonomous Organization)

Launching DAO Staking Protocol

Launching DAO Voting Mechanism

Exchanges Listing

Project Update Ver.2

Team Gameplay Feature Teaser

X. Tokenomics

Airdrop 2%

Marketing 2%

60% Pool Reward

Presale & Liquid 36%

XI. Taxation

Tax - Buy 1% / Sell 5%:

Buy 1% - Reward Pool

Sell 1% - Reward Pool

Sell 2% - LP Pool

Sell 2% - Marketing
